DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 - 19, drawn to an apparatus for measuring formation resistivity having plurality of voltage measurement electrodes disposed on the sonde at spaced apart locations and at least one current electrode disposed on the sonde, classified in class 324, subclass 347.
 - II. Claims 20 - 37, drawn to a method for measuring resistivity of earth formations wherein electrical current is conducted between a first selected position in the wellbore through the conductive pipe to a second position along the pipe near the Earth's surface and digitally sampling a voltage drop measured between a third and fourth selected positions along the pipe between the first and second selected positions, classified in class 324, subclass 373.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as the current electrode and plurality of voltage measurement electrodes can be used to measure formation resistivity through a conductive pipe in a wellbore without a particular arrangement of the electrodes in electrical contact with the conductive pipe.

See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Mr. Fagin on 12/23/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Reena Aurora whose telephone number is 571-272-2263. The examiner can normally be reached on Monday - Friday, 7:00 - 3:30.
